VERSATILE FACILITIES

The Mid-America Science Park (MASP) is one of the most versatile science parks in the country. MASP invites entrepreneurs and existing businesses, military representatives and contractors, students and community members to pursue research, development, production, training and education on its campus. MASP provides services and amenities to these audiences via three interconnected focus areas, the Worldwide Communication and Conference Center (WC3), the Business Incubation and Acceleration Center and the Training and Research Center.

HIGH-TECH COMMUNICATION

Regular meetings and instant, seamless communication are key to successful business relationships and enterprise. The technologically sophisticated WC3 is available to all tenants and guests conducting conferences, meetings, training and presentations. The WC3 meets clients' specific needs by providing the most advanced, effective and appropriate communication space, techniques and technologies for all types of meetings and events.

YOUR GATEWAY TO THE WORLD

PRESENTATION HALL

MASP's 118-seat Presentation Hall is one of the most technologically advanced conference centers in the region. Each seat is equipped with wired and wireless Internet connections, allowing participants to hook up their laptops and fully engage in interactive programs and trainings. The videoconferencing capabilities of this auditorium-style facility allow tenants and guests to speak with, hear and see colleagues anywhere in the world in real time.

FACILITY-WIDE AUDIO AND VIDEOCONFERENCING

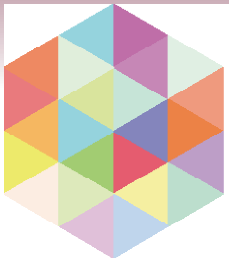

MASP offers the ability to host an interactive video or Web conference from any room in the facility when two-way communication with a remote site(s) is a must. Conferencing facilities include the 118-seat Presentation Hall and are scalable to accommodate additional on-site participants. Clients may connect with as many as three remote locations simultaneously. This service is an efficient and cost-effective means of increasing productivity. Videoconferencing maximizes time by reducing travel and accelerates the communication of time sensitive information.

- Integrated audio and videoconferencing systems are available in the Presentation Hall and all executive conference rooms
- Mobile conferencing units allow clients to communicate privately with stakeholders from any room or courtyard in the facility
- Desktop conferencing units enable entrepreneurs to connect globally from their individual lab facilities

BENEFITS OF AUDIO AND VIDEOCONFERENCING:

Each person participating in audio or videoconferencing will be fully engaged in every aspect of an event and will have the ability to interact with the presenter and other audience members in real time. Audio and videoconferencing also provide clients with increased access to information and experts beyond the Kentuckiana region.

- Broadcast audio and video from your conference or meeting to any room in MASP, the atrium and the external courtyard
- Collaborate in real time with any standards-based video device around the world

Additional Conferencing and Meeting Rooms

MASP welcomes businesses, regional organizations and the community to conduct professional meetings, workshops, seminars and receptions at the Park. Visitors have access to smaller, configurable meeting rooms seating 10 to 48 individuals, each equipped with Wi-Fi and hard-wired Internet access and advanced presentation, video, teleconferencing and webconferencing equipment.

Affiliate Program Facilities

Small businesses, entrepreneurs, telecommuters and individuals in need of regular meeting or collaboration space may sign up for our flexible affiliate client program. Customized access is available.

Computer Classroom

Classrooms are equipped with the latest presentation tools and learning technologies including 24 personal computers and an integrated audio-visual system.

Display Hall

This pre-function area is an ideal location to set up event registration tables and poster displays or participate in networking mixers. This flexible space also accommodates banquet tables for up to 58 guests, creating a perfect setting for dinners and receptions

Community Events

Area residents are encouraged to attend MASP's community gatherings which include movie nights, brown bags and other fun and educational events.
